

2012 Basic Concrete Technology Workshop Topics

- ◆ Materials for concrete, such as portland and blended cements, supplementary cementing materials, aggregates and admixtures
- ◆ Concrete durability
- ◆ Procedures for concrete mix proportioning
- ◆ Batching, mixing, transporting, handling, placing, consolidating, finishing and curing concrete
- ◆ Hot and cold-weather concreting
- ◆ Cause and methods of controlling volume changes
- ◆ Control tests for quality concrete
- ◆ Special types of concrete, such as high-performance, lightweight, and self-consolidating concrete,
- ◆ Standards from both Canadian Standards Association (CSA) and American Society for Testing and Materials (ASTM) are referred to extensively
- ◆ Open Book Exam

This one and a half-day course presents an overview of the properties of concrete as needed in concrete construction, including strength and durability. Students receive a copy of *Design and Control of Concrete Mixtures*, and relevant industry handouts.

Dates

March 29 & 30, 2012
 8:00 am to 4:30 pm Thursday
 8:30 am to Noon on Friday

Registration Fees

Member price \$495.00 (plus HST)
 Non-Members \$600.00 (plus HST)
Registration Fee includes course material, including Design & Control of Concrete Mixtures textbook, continental breakfast both days and lunch on the first day, but not hotel accommodation.

Fees for non-members must be paid by March 23, 2012

Location

BCRMCA Training Room
 26162—30A Avenue, Aldergrove, BC

Accommodations
